FIGURES AND DIAGRAMS FOR “STATISTICS GEEKS” WINNING MARGINS

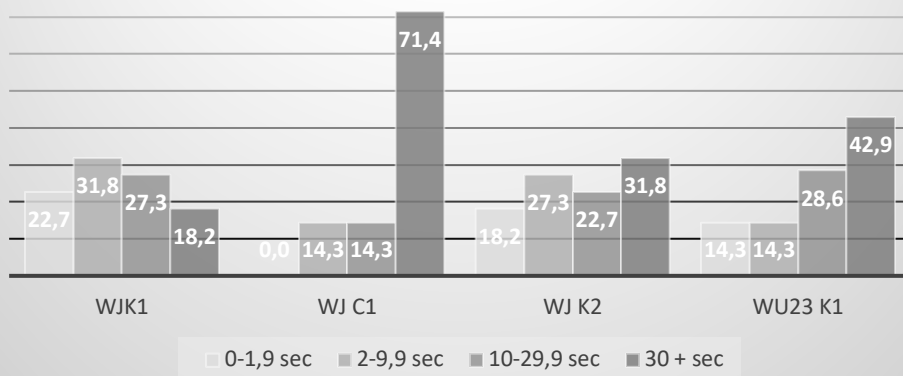

ALL FIGURES IN %

WINNING MARGINS: WOMEN SENIORS

WINNING MARGINS: WOMEN JUNIOIRS & U23

SOME MORE FIGURES FOR STATITIC NERDS

Winning margins in all classes (normal distance). All values in seconds.

Some definitions:

Average/Mean: Total of time diff / number of results

Median: The value in the middle of ranked results

Standard deviation: a measure that indicates how much the values of the set of data deviate (spread out) from the mean. To put it differently, the standard deviation shows whether your data is close to the mean or fluctuates a lot.

FINAL WORDS

During the last 20 years I have collected all results from every World and European Championships in Canoe Marathon. I have made databases which covers all participants in all races including the races in 2023: 19 ECHs and 31 WCHs. For Europeans: a base with 3506 names. For the Worlds: 4212 names.

From the databases/spreadsheets it is easy to produce statistics for many purposes. The editor has always been a "statistics geek". Maybe also other people –like commentators and organisers - find some interesting facts about canoe marathon, the competitors, distribution of medals individually or by nation.....or something they find more interesting.

All figures and facts are based on the official results which are available. I cannot give any guarantees that all the information there is 100% correct, and in some old documents some information is lacking.

A big "thank you" to Caroline Cooper for let me use some of her excellent pictures to refresh pages with lots of names and figures.
